

AddBike

Clever with you

Cleverness

Innovation

Safety

Our DNA

AddBike wants to make everyday cycling easier and safer with products designed for you, by you and adapted to both accomplished cyclists, families and businesses.

One ambition

To remove any remaining barriers to daily use of bicycles.

One conviction

The bicycle is an unquestionable vector of the future, especially in terms of health, sustainability, and economic benefits. It generates employment and fosters social connections but is also undeniably crucial in tomorrow's challenges.

Our business model in COOP (production cooperative)

For us, the companies of tomorrow will be those who, like us, place the human and the collective at the heart of their project. That is why we have chosen to become a cooperative and participatory association and thus affirm our commitment to democratic governance where every employee has a voice, thus strengthening our unity and resilience.

Our products are meticulously designed in adherence to our three core values, aimed at simplifying and ensuring the safety of every bicycle journey while simultaneously expanding its potential.

French design

in our design office in Lyon

Manufacturing in France at the Usine à Vélo

a manufacturing cooperative supported by the Auvergne-Rhône Alpes region

Relocating our bike components to France and Europe

is one of our main goals. this is why we are investing in several initiatives led by CARA Active Mobility

Highly responsive after-sales service

of partners located throughout France
